  Less Management

HUNE ®

① Coordinated system for your online booking APP

Traffic: Your technology team may rack their brains to figure out the way to increase traffic for hotel direct booking platform. But how to attract the traffic, how to catch eyes while in the competition with other platforms?

Why not try the technology way? Use our solutions to construct your service system. Offering the convenient booking and unlock way in one APP will increase your guests loyalty to your APP. Then your other promotion plan will be more effective.

② An innovative wireless unlock system for your guests

Information safety: Nowadays guests might not wanna get crowed in reception to receive the room cards. Not only because it's tedious, but also because they may have to take the risk of private information leaking.

Booking, verifying and paying in a reliable and trustworthy system is definitely safer than filling in your personal information in public. For normally, we can't prevent the unnoticeable immorality in this kind of circumstances.
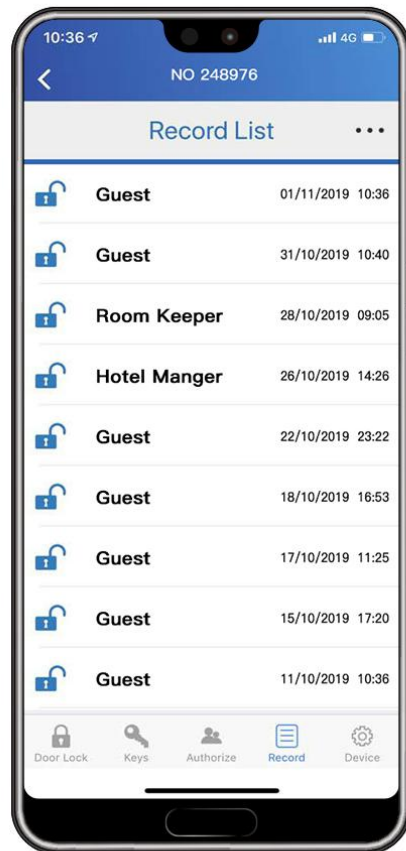

③ Effective system to show your premium services

Efficiency: Losing room card is a risk to both hotel and guests, but it keeps happening anyway. Actually it is harder to lose a smart phone, cause they are your frequently used belongings.

Using an E-key to unlock the hotel rooms will be the most convenient and safe way for the guests. At least your phone will need to be unlocked to get information and it can be traced by GPS.

④ Comprehensive system for your daily management

Safety: Identify who has entered the room is crucial to imputation once some unexpected situation happen.

Hotel authorized staff can download the unlock records through Bluetooth. Data can be sent via APP by internet to whom may concern to solve problem immediately. No necessity to communicate for several time to confirm.

Tracking: Occupancy rate on time
