Whiteboard Capabilities

Experience the industry's best intuitive and responsive touch with the feel of regular whiteboarding at your finger tips with the help of easy to use and understand tools.

Multi Points Touch		
Smooth Surface		
Advanced IR frames – no dead points		
Various colors and pen thickness		
Precise touch and multi writing		
Protective surface		

Precise touch and multi writing

OneScreen recognizes even the smallest touch points more accurately and instantly allowing you to work flawlessly without even thinking whether the touch response is working or not, giving you the ultimate experience of native whiteboarding experience.

Advanced IR frames – no dead points

Commercial Grade IR Frames allow you to take control of the screen from all four corners without leaving any dead points or places on the screen.

Smooth surface

Almost next to none difference between bezels and screen itself, gives you the ultimate pleasure of smoother surface writing with better aesthetics to compliment ambiance.

Multi Points Touch

It gives you the joy of using your touchscreen just like any other regular tablet with the ability to have upto 20 points touch, allow multiple users to work on the same screen simultaneously.

Various colors and pen thickness

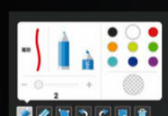

Work with multiple type of pen thickness as well as various colors, allow you to highlight your annotations beautifully yet impressive at the same time.

Protective surface

Commercial Grade Level 7 MoHS Glass Protection gives you peace of mind from scratches or even the damage to the screen in the event of the external shock.

Easy Whiteboarding

Experience the industry's best standard intuitive and responsive touch with the feel of regular whiteboarding at your finger tips with the help of easy to use and understand tools

Select Writing Pen

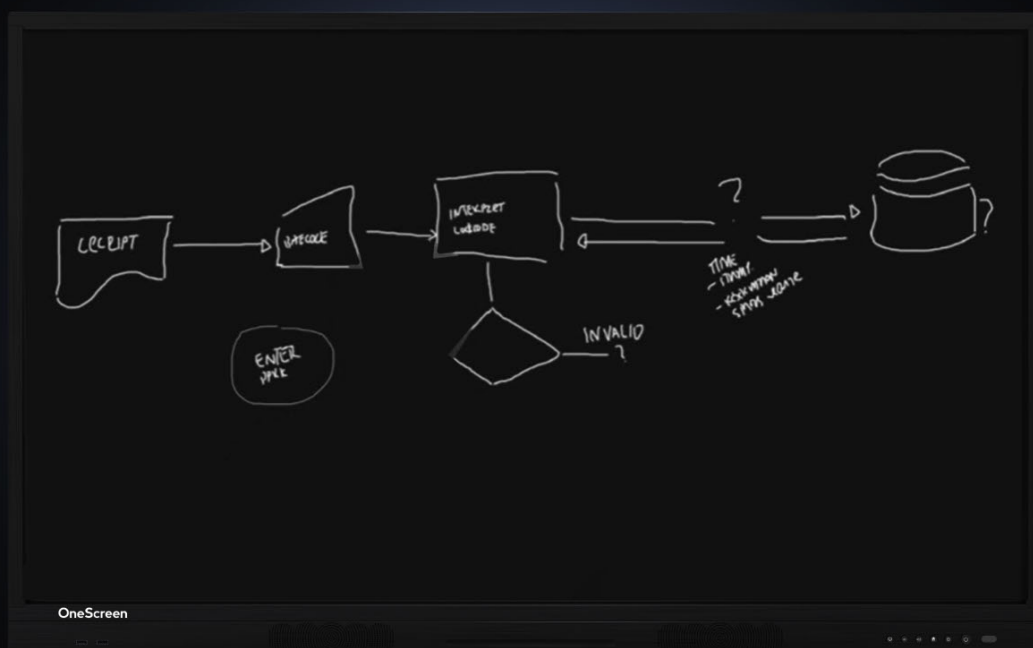

Smooth Writing

Drag/ Copy / Delete

Gesture Erase

Start Plain Board

Start your brainstorming space with just a single click and there you have your whiteboarding space available in multiple colors as well as different patterns. If not enough, you can save your own working patterns as whiteboard background. And yes, it also supports multiple pages in multiple background options so everyone can have its own whiteboarding space and color and have it their way.

Open Files

Open your whiteboarding files whenever you need and start working on them again, whether it be saved on internal memory or on a usb flash drive. Or better bring in your images and docs to whiteboarding space and start your annotations.

Select and Move

It also allows you to select your annotations or writings and move them across the board, make them bigger or smaller, no problem, just by pinching in or out.

Human Gestures

Involve more in brainstorming rather than on focusing on tools, OneScreen offers basic hand gestures like pinch to zoom in or out, palm as an eraser, use fingers to move objects.

Capture and Save

Save your sessions in multiple formats like PNG or PDF formats for easy share of documents and have as many pages as you want in either single file or multiple.

Direct Email

Configure your email client and email the complete whiteboarding space directly from the whiteboarding application without hassles of attaching files.

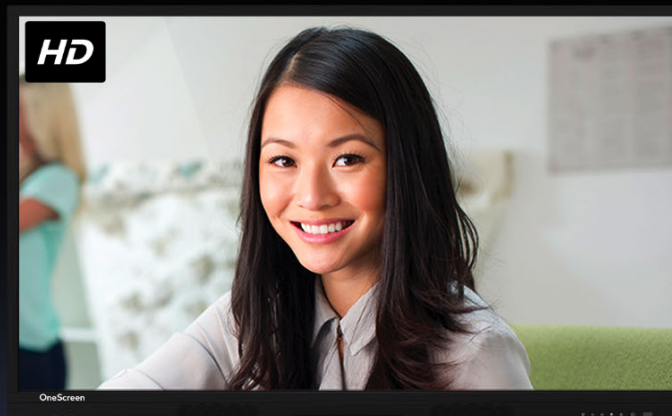

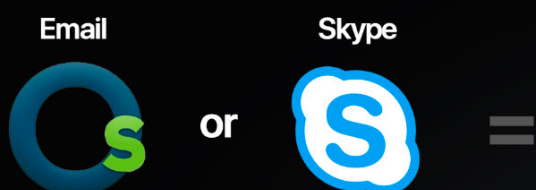

QR Code File Sharing

Generate QR Code for the whiteboard that you worked on and get your files on your smart devices or laptops or tablets and start sharing files the way you like it.

Video Conferencing

Make your meetings even more productive by inviting people from outside meeting rooms. Want to invite people from your different branches, don't worry it is already covered.

OneScreen offers a robust On-Chip Processor that can handle Video Conferencing without even a computer as well. With OneScreen Hype, ultimate video conferencing tool you can always invite people for a meeting just by entering their email address or by inviting them from the contacts list. Or use Skype for Business if you are already using same for your video communications. OneScreen hardware is fully capable of handling Video Collaboration from its On-Board Processor and doesn't even require additional PC for the same.

OneScreen Hype Video Calling

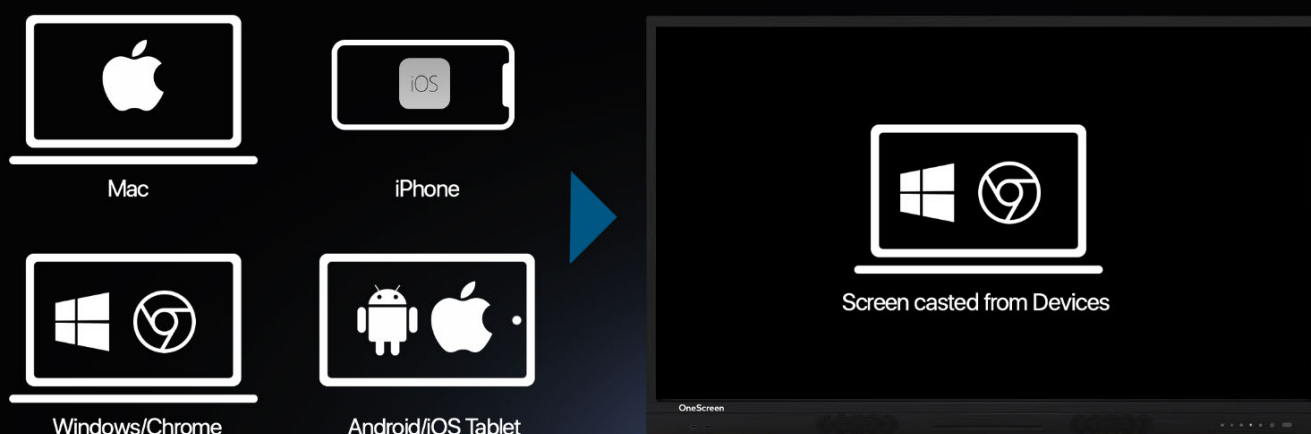

Conduct highly secured meetings with upto AES256 bit encryption. Invite people using contacts from hype or just invite them for an Adhoc meeting using their email addresses. Good part is they don't need the license for that all they need to do is just join the meeting using provided link and they can join as a guest. Get upto 60 fps of video transmission with High definition resolution, provided you have enough juice on the network part.

Skype for Business

Install Skype for Business on OneScreen from Google PlayStore and get the ball rolling, organizations who are already using Skype for Business they don't need to feel like left alone as we have got that covered as well. OneScreen fully supports Skype for Business Meetings as its hardware is really that powerful.

Wireless Screen Sharing

Get rid of cables and share your screens wirelessly on OneScreen, no need to have additional softwares or hardware when you have Apple devices. Use it like Apple TV.

Not just cast, Control

No need for additional cables now to share your screen and control at the same time, OneScreen offers industry's best wireless screen sharing from Windows / Mac Laptops yet it also supports the Touch Feature as well. No more need of wireless presenters or go to your laptops to change slides or work on them. OneScreen has got wireless screen control covered as well.

Screen Replication across Smart Devices

Unlike other devices in the market, OneScreen offers not just screen replication from smart devices to OneScreen, but, it also supports Screen Sharing from OneScreen to Smart Devices like phones, tablets, laptops. Imagine a big room with people sitting on the back can't read everything on OneScreen, you can just simply see the same screen on your tablets or phones.

EShare Application

Allows you to control, annotate, make your smart devices a Document camera or even browse through your files and show what is necessary to show, rather than casting complete phone or tablet screen. Eshare Application gives you additional level of features if used with OneScreen. And its free.

Multi-Screen Casting

Want to compare multiple files from different devices, look nowhere else, neither you need any additional hardware. OneScreen can display 4 different displays simultaneously allow you to compare and focus more on work rather than switching inputs or devices.

SingleDisplay Display of single device will be shown

Windows

Mac

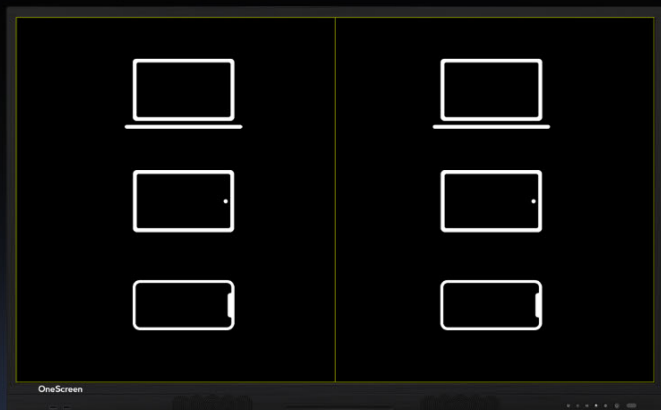

Tablet

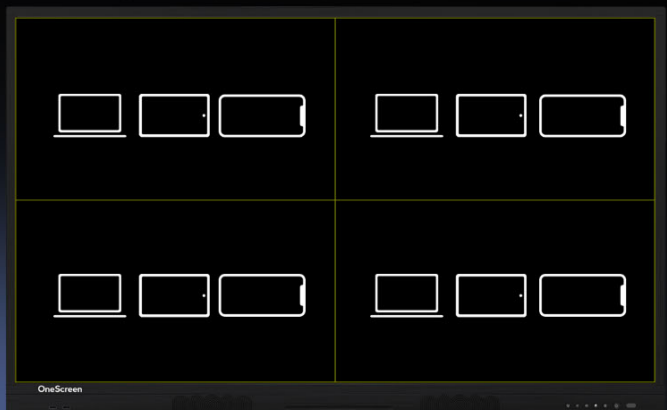

Phone

Dual Display Display of 2 devices will be shown

Quad Display Display of 4 displays will be shown

Don't settle for just wireless casting

Don't just settle for wireless casting with OneScreen, it gives you the leverage of casting 1, 2 or 4 screens simultaneously from different devices, be it a phone, tablet or laptop, it has got it all covered. You don't even need to worry about making it happen, it does it all automatically for you, just cast.

Commercial Grade 4k UHD Display

Why settle for lower resolutions when you have the power of 4K Ultra High Definition Resolution available to work for you.

Get the Best Picture Quality

OneScreen ensures that you get the best picture quality and enhances your experience with the Industry's leading panels manufacturers and gives you the Commercial Grade Display.

Ultra High Definition Used

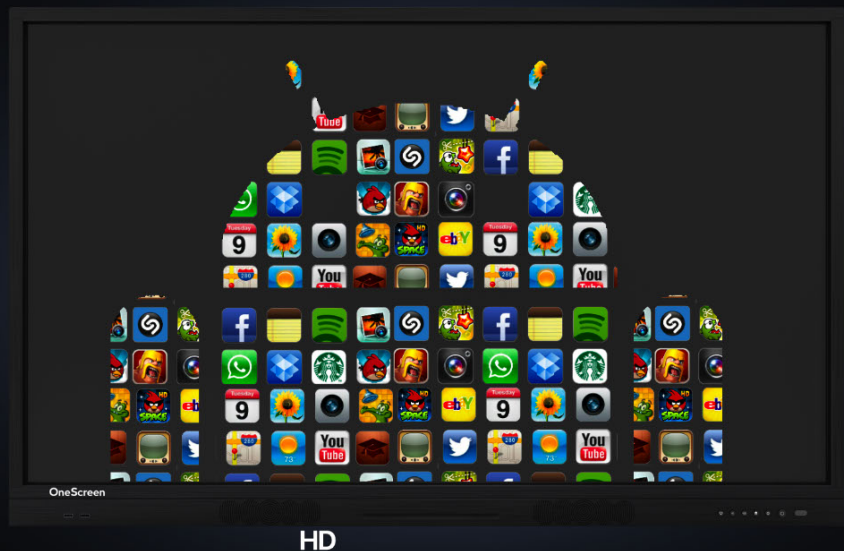

You can't miss even the smallest of details using OneScreen, it offers 4k UHD Resolution Display with the crisp yet vibrant colors, thanks to the commercial grade panels used.

Wide Angle and Life like Colors

It gives you the highest wide angle views having an IPS Display you can't miss the life like colors. Whether it be presentations, whiteboarding, video playback or even games, you will love what you are looking at.

Power of Google Playstore

Get your OneScreen with an In-Built Android 8.0 Operating System. With the power of Quad Core Processor and with tons of in-built memory and on-board ram you can always install any application or game of your choice. And we won't leave you there, you will also get OTA (Over the Air) updates from OneScreen, whenever, there is a newer version of Android released for its hardware, which is always planned as we take updates and patches seriously.

Get the latest off the shelf

OneScreen offers MS Office File Viewer, Youtube, PDF Viewer, File Explorer, PlayStore, Video and Audio Viewer, OneScreen Hype Pre-installed that comes out of the box, ready to be used. You will always be ahead of the competition when it comes to OneScreen, as OneScreen offers original and legit Playstore.

Get real Google Playstore

Unlike other players in the market, OneScreen offers original and registered Google PlayStore for its customers from where you can download gazillion of applications or games of your choice, if you think you need anything additional just download it and enjoy.

OTA Updates

Be updated with OTA (Over the Air) updates from OneScreen as we keep upgrading applications and firmwares for OneScreen and you will always be updated whether it be applications, firmwares or android versions.
